Publish code in wordpress

language='cpp' indicates the language of your code. Here, cpp = C++

if you code is written in java, then write java instead of cpp. A list of available languages and there corresponding naming syntax are given below :

Bash – bash

C++ – cpp

C# – csharp

CSS – css

Delphi – delphi, pascal

Diff – diff

Groovy – groovy

Java – java

JavaScript – jscript, javascript

Perl – perl

PHP – php

Plain text – plain, text

Python – python

Ruby – ruby

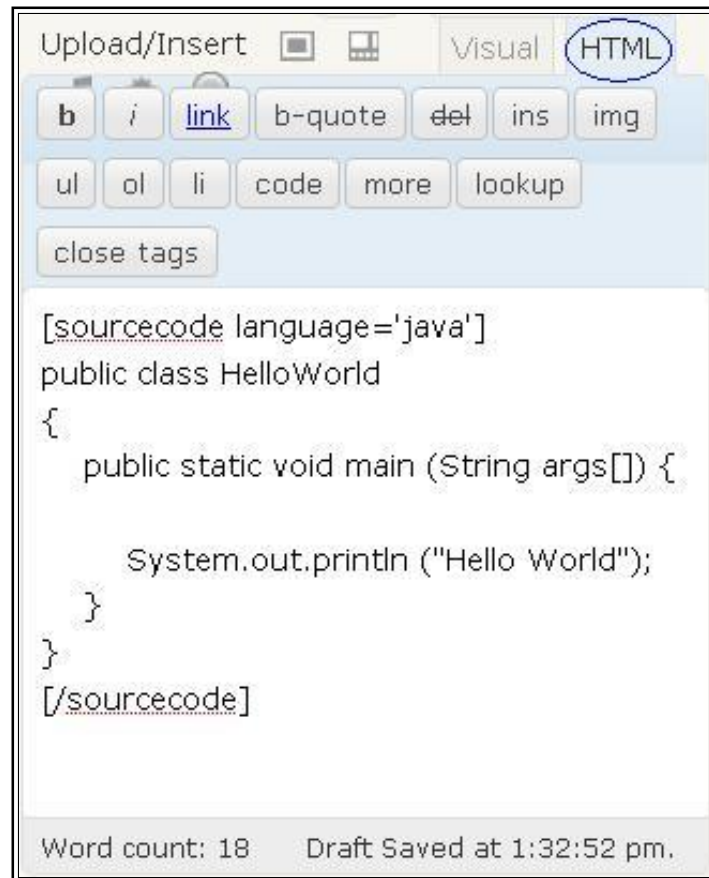

Scala – scala

SQL – sql

VB – vb

XML/HTML – xml, html, xhtml

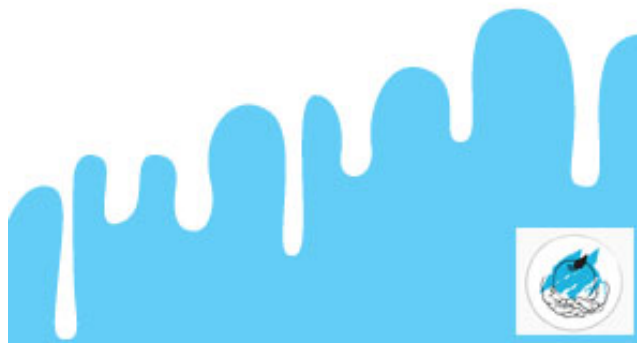

if you wish to publish code in your post then select HTML text editor and do the same as describe above. Be Careful, This will not work in Visual text editor. See the screen shot. Hope it'll help.

Code in Post
